

## The Great Experience

Hello, my name is Annalise Wisler, I am a sophomore at Paso Robles High School. This is my first year taking a class in the Endeavour academy It was a wonderful experience. I love the fact that everything is hands on, I learn that way the best. I would definitely take this class again. I learned so much from it. This class has opened up my future and taught me self discipline.

To be honest when I first came into this class I doubted it. I am glad I stayed in. I feel like I can not say enough of how much I learned. I have always wondered how the little things in life work. This class has taught me that. There are so many electronic devices that you do not realize make such an impact on you life.

The self discipline that this class has taught me I can use in every day life. If I were to not do my work it affected every other thing I did in the class. Once I have a job that is how it will be, I will have to get all the little things before I can move up in the working order.

This class has opened up my eyes to many different opportunities and what career I could merge into. If I were to apply to Cal Poly of San Luis Obispo, CA, taking this class would improve my chances of getting in. Cal Poly has been one of my top choices in colleges for a long time because it is so close and they a wonderful equestrian program. That is my main focus of life but the Endeavour Academy has opened my eyes to new and somewhat a little more exciting things.
