Through the Medi-Cal Billing Option this LEA may submit claims to California Medi-Cal for covered services provided to Medi-Cal eligible children enrolled in special education programs. The Medi-Cal LEA program is a way for school districts to receive federal funds to help pay for health-related special education and related services.

Do you give PRJUSD permission to bill Medi-cal for services provided to your child? Yes No

Dear Parent/Guardian and Physician:

Our schools are participating in the MOVE Program. Below you will find the purpose of this program.

In order to be sure a student does not have medical needs that contraindicate the need to sit, stand and/or walk, we will need to have the Physician's Clearance form completed and returned.

Thank you for your cooperation. If you have concerns, please feel free to call our office at (805) 769-1000.

Sincerely,
Ashley Aiello RN
Coordinator of Health Services

MOVEMENT OPPORTUNITIES VIA EDUCATION (MOVE) Purposes of the Program

The MOVE Program is designed to:

1. Use education as a means of systematically acquiring motor skills.
2. Provide a program whereby participants naturally practice their motor skills while engaged in other educational or leisure activities.
3. Reduce the time and energy requirements for custodial care.
4. Provide a way to measure small increments of functional motor skills and therefore provide a way to show improvement.
5. Provide a sequence of motor skills which:
 - a. Are age-appropriate and based on a top-down model of needs rather than the traditional developmental program based on the sequential skill acquisition of infants.
 - b. Are valuable and usable to the participants right now as well as in adulthood.
 - c. Increase the availability of environments in the community as well as in the home.
 - d. Range from the level of zero self-management to the level of independent self-management.
6. Provide the individual with the basic motor skills, which are needed, for development of other skills such as expressive language, self-care, and work opportunities.

The MOVE Program is based on teaming the expertise of therapy and education to address the functional needs of students when they become adults. This teaming has resulted in the development of equipment, which has been designed specifically to meet the following needs:

1. The equipment places students in positions for performing functional activities such as moving from one place to another, self-feeding, self-controlled toileting, table work, and leisure activities.
2. The equipment allows the staff to physically manage the student while teaching appropriate movement patterns.
3. The equipment allows the students to practice their motor skills independently.
4. The equipment is designed to help improve the bone and joint health of the students.
